

TRAINING

TRAINING COURSE CONTENTS

AD-START PROGRAM

Introduction to Electronics
The Evolution of
Automotive Electronic
Systems
The Function and Purpose
of a Scantool
Engine Management
Systems & Components
Scantool vs Diagnostic
Scantool
The Digital Oscilloscope
Four Gas Analysis

AD-DRIVE PROGRAM

Electronic Components in
Detail
Emissions Control Systems
The Oscilloscope for
Specialist Technicians
The 4 Gas Analyser for
Specialist Technicians
Sensor Simulation
On-Bench Component
Testing
Advanced Diagnostic
Procedures

With technology in the Motor Industry changing so rapidly, up to date training has now become an absolute necessity. The testing and repairing of modern electronic systems is way beyond the scope of a "Scanner" only. To accurately diagnose and identify the problem first time, additional equipment and specialised training are required.
